

Contents

1	About This Book	5
I	Basics	9
2	Properties of Air Drag	11
2.1	Drag at High Speeds	12
2.2	Mach Number	14
2.3	What Embodies a Drag Model?	16
3	From Drag to Deceleration	17
3.1	Calibre is not Diameter	17
3.2	Diameter and Sectional Density	20
4	Projectile Shapes	23
4.1	Names and Geometry	23
4.2	Historical Use of Projectile Shapes	26
5	Measuring Air Drag	39
5.1	Wind Tunnel	39
	Example of Wind Tunnel Results	41
	Questionable Wind Tunnel Results	43
	Cylindrical Projectiles – Scale Effect	45
5.2	Range Firings	47
	Exotic Methods	47
	Standard Methods	49
5.3	Determining the Drag Coefficient	53
5.4	Creation of a Drag Model	59
6	Catalogue of Drag Models	67
	Realistic Mach Range 1.2 through 3	67
6.1	Russia: Majewski-Sabudski	70
6.2	Soviet Union: 1943	73
6.3	Soviet Union: Schapiro-Mazing-Prudnikow	75
6.4	France: Gâvre (USA: G1)	77
	Data Collection for Model GAVRE_G1	77

Other Sources for Gâvre	79
6.5 France: Demogue	81
6.6 France: Dupuis	83
France: Dupuis (for j 0.080)	85
France: Dupuis (for j 0.140)	86
France: Dupuis (for j 0.240)	87
6.7 United Kingdom: 1910 Law	88
6.8 United Kingdom: 2_CRH	93
6.9 United Kingdom: 1940 Law (USA G8)	94
6.10 United Kingdom: 5_10_CRH	98
6.11 United Kingdom: 2_4_CRH	99
6.12 United Kingdom: 8_16_CRH	100
6.13 United Kingdom: Hodsock	101
6.14 Germany: Burgsdorff	105
6.15 Germany: S-Geschoss (Luftwiderstandsgesetz Nr. 1)	107
6.16 Germany: Luftwiderstandsgesetz Nr. 2	109
6.17 Germany: Kutterer	111
6.18 Germany: RWS 1943	113
6.19 USA: Ingalls	116
6.20 USA: G1	117
6.21 USA: G2 (Also Known as J or J2)	118
6.22 USA: G3	120
6.23 USA: G4	121
6.24 USA: G5	122
6.25 USA: G6	124
6.26 USA: G6 (FORTRAN Code)	126
6.27 USA: G8	128
6.28 USA: G7	130
6.29 USA: MCCOY_M2	132
6.30 (USA:) BRL620_M2	134
6.31 USA: NAVPG	135
6.32 USA: Lowry	137
6.33 USA: M855_WEIN	139
6.34 USA: FTB_M118	141
6.35 USA: FTB_190FMJ	142
6.36 Italy: Siacci	143
6.37 Netherlands: Normaal Schietschool	145
6.38 Switzerland: Gewehrpatrone 11	148
6.39 Switzerland: Gewehrpatrone 11 (Kneubühl)	150
6.40 Switzerland: Gewehrpatrone 11 (Curve 41.02)	152
6.41 Sweden: 7.62 mm Projectile	154
6.42 Spain: CETME Long Projectile	156

6.43	Special Cases	158
	Simple Power Law	158
	Constant Drag Coefficient	159
6.44	Elementary Projectile Shapes	160
	Sphere	160
	Cylinder According to Cranz	162
	Cylinder According to Krupp	162
	UK Proof Law (1950)	162
	Cube According to Carter	163
6.45	Radar Data for Lapua Projectiles	164
6.46	Lapua AP485	166
6.47	Lapua AP492	167
6.48	Lapua API526	168
6.49	Lapua AP529 Old	169
6.50	Lapua AP529 New	170
6.51	Lapua B408	171
6.52	Lapua B466	172
6.53	Lapua B476	173
6.54	Lapua BULLEXN	174
6.55	Lapua BULLEX2	175
6.56	Lapua D46	176
6.57	Lapua D166	178
6.58	Lapua E539	180
6.59	Lapua G490	181
6.60	Lapua GB422	182
6.61	Lapua GB432	183
6.62	Lapua GB458, GB464, GB489, and GB504	184
6.63	Lapua GB478 and GB542	185
6.64	Lapua GB488	186
6.65	Lapua GB491 and GB552	187
6.66	Lapua GB493	188
6.67	Lapua GB501	189
6.68	Lapua GB527 and GB545	190
6.69	Lapua GB528	191
6.70	Lapua GB541 and GB544	192
6.71	Lapua GB543	193
6.72	Lapua GB546	194
6.73	Lapua GB547	195
6.74	Lapua GB550	196
6.75	Addendum: Lapua GB551	197
6.76	Addendum: Lapua GB553	198
6.77	Addendum: Lapua GB554	199
6.78	Lapua N505	200

6.79	Lapua N508	201
6.80	Lapua N518	202
6.81	Lapua N522	203
6.82	Lapua S374	204
6.83	Lapua S405	205
6.84	Lapua S538	206
6.85	Models in Tabular Format	207
6.86	Addendum: VM_556	208
6.87	(France:) 24C_ETBS	209
6.88	(France:) 32N_ETBS	211
6.89	(France:) 33D_ETBS	213
6.90	(France:) 61_ETBS	215
6.91	(France:) M74_ETBS	217
6.92	Special Cases: UNSTx_G7 Models	219
7	Finding the Best Fitting Drag Model	221
7.1	Compiling a Velocity Table	221
7.2	Fitting by Using the Form Factor	224
	Determining the Form Factor for Another Model	226
7.3	Measuring Fit Quality	227
7.4	Form Factor Paradox	228
7.5	Effect of Changed Constants	231
7.6	Program-Generated Form Factor Table	231
7.7	Short Form Factor Table	234
7.8	Validation	235
8	Basics of the Siacci Trajectory Computation	239
8.1	Siacci Table	239
	Ballistic Coefficient	241
	Numeric Example	241
	Other Drag Models	242
	When the Table Does Not Fit	243
8.2	Remarks on the Ballistic Coefficient	244
	Siacci Form Factor	244
	Primary and Secondary Functions	245
9	Trajectory Computation Using Numerical Integration	247
9.1	Detailed Method Description	247
	Start Values	247
	Subprogram for Deceleration	248
	Subprogram for Gravity	249
	Nyström Set of Formulas	250
9.2	More About Numerical Integration	254

9.3	Other Computation Methods	257
9.4	Graphical and Mechanical Methods	258
9.5	Electronic Computers	262
9.6	Example of Form Factor Use	264
II	Extended Basics	267
10	Higher Order Trajectory Models	269
10.1	Two Degrees of Freedom (2DOF)	269
10.2	Three Degrees of Freedom (3DOF)	270
10.3	Six Degrees of Freedom (6DOF)	270
	Gyroscopic Motion of the Projectile	272
	Epicyclic Swerve	273
	Consequences for Calculation	275
	Angle of Attack Effect on Drag	276
	Magnus Effect	278
	Loss of Spin	282
10.4	Modified Point Pass Model (4DOF)	283
10.5	Five Degrees of Freedom (5DOF)	284
10.6	Seven Degrees of Freedom (7DOF)	284
11	Supplement Equations for 2DOF	285
11.1	Digression: Bullet Dispersion	285
11.2	Crosswind	286
	Vertical Effect of Crosswind	287
	Head- and Tailwind	288
11.3	Drift	288
11.4	Coriolis Force	290
	Coriolis Force from Radial Movement	290
	Coriolis Force Due to Tangential Movement	291
	Estimation Equation for Horizontal Coriolis	293
12	Reverse Trajectory Computation	295
12.1	Using Velocities	295
12.2	Using Time of Flight	298
12.3	Using Elevation and Range	300
12.4	Using Change of Center of Impact	302

III Disturbances of the Trajectory	305
13 Interior Disturbances	307
13.1 Actual Firings	307
13.2 Muzzle Velocity Variability (Shot to Shot)	310
13.3 Muzzle Velocity Variability Between Weapons	312
13.4 Projectile Mass	314
13.5 Projectile Shape (Drag Coefficient)	316
Isolating Mass and Drag	319
13.6 Results for C1 and C2 Ammunition	320
13.7 Summary of Interior Disturbances	324
14 Exterior Disturbances	325
14.1 Gravity	325
14.2 Standard Atmosphere: Dry Air	327
14.3 Real Atmosphere: Moist Air	329
Air Humidity	330
14.4 Density of Moist Air	332
14.5 Speed of Sound in Moist Air	333
14.6 Overview of Standard Atmospheres	334
14.7 Determining Actual Air Pressure	336
14.8 Virtual Temperature as Auxiliary Means	337
14.9 Typical Atmospheric Data in Germany	338
Sea Level	339
Higher Altitudes	341
15 Crosswind Revisited	345
15.1 Alternative View	346
15.2 Typical Crosswind	346
15.3 Examples of Crosswind Effects	348
15.4 How to Compute Hit Probability	350
16 Cant	353
IV Results	355
17 Base Catalogue of Form Factors	357
17.1 Slender Boattailed Projectiles	357
7.9 mm schweres Spitzgeschoss sS (12.8 g)	357
SmK and SmE Variants of the 7.9 mm	360
FR: 8 mm Mle 1886 balle D	361
FR: 8 mm Mle 1932N	362

FR: 7.5 mm Mle 1933D	363
CH: 7.5 mm Gewehrpatrone 11	365
US: 7 mm (.276) Pedersen	367
US: 7.62 mm (.30) M1 – Later M72 and M118	367
SU: 7.62 mm LPS and D	369
UK: 7.7 mm (.303) Mark 8	370
SE: 6.5 mm m/41	371
SU: 5.45 mm M74	372
SP: CETME Long Projectile	373
17.2 Slender Bullets with a Straight Base	376
7.9 mm Spitzgeschoss S (10 g)	376
US: 7.62 mm (.30) M1906 – later M2	377
UK: 7.7 mm (.303) Mark 7	378
FR: 7.5 mm Mle 1929C	379
SU: 7.62 mm 1908 or L	381
17.3 Interim Conclusions	383
18 Form Factors for Intermediate Cartridges	387
DE: 7.9 mm Kurzpatrone 43	387
SU: 7.62 mm M43 (Kalaschnikow)	388
"Western" Variants of the M43	388
19 Form Factors for the 7.62 mm NATO	391
19.1 Shapes Similar to M80	391
British L2A2	395
French Mle 1961	396
19.2 Shapes Similar to SS77	397
A Swedish Step Backwards ?	401
Light CETME NATO Projectile	403
20 Form Factors for the 5.56 mm NATO	405
20.1 M855 Drag Data	405
20.2 SS109 Data	410
Strange Drag Model	412
20.3 Predecessor: 5.56 mm M193	414
20.4 Other 5.56 mm Bullet Shapes	417
5.0 g Mauser-IWK	417
American Mk 262	418
Swiss GP90	421
21 Round Nose Bullets	423

22 Form Factor Dependence on Weapon	427
22.1 Supersonic Example	427
22.2 Transonic Example	429
22.3 Ammunition Changes	430
23 Center of Impact: Computed versus Measured	433
23.1 Description of Test Procedure and Computation	434
23.2 Problems	435
23.3 Calibre 5.56 mm	440
24 Conclusions from Data Published by Bryan Litz	443
24.1 Procedure Used by Bryan Litz	444
24.2 My Own Analysis	444
24.3 New Developments	449
25 Estimating Drag from Projectile Shape	451
25.1 Krasnov Formula	452
25.2 McDrag Software	452
25.3 Litz Formula	454
25.4 Digression: Boattail	454
Remarks on Stability	457
25.5 Higher Level Estimation Software	458
26 Conclusion	459
26.1 Insights	459
26.2 Closing Remark	460
26.3 Acknowledgements	461
V Additional Matter	463
27 Appendix A: Computer Data	465
28 Appendix B: Miller Stability Formula	467
29 Appendix C: Temperature and Muzzle Velocity	469
30 Appendix D: Angular Measurement	473
31 Appendix E: List of Symbols	475
Notes on Sources	479
Sources and Literature	483
